SUMMARY

Product Designer with 7+ years of experience designing complex, user-centered digital products across web, mobile, and enterprise platforms. Specializes in translating ambiguous business problems into intuitive, scalable design solutions through rigorous user research, information architecture, and systems thinking. Experienced in 0-to-1 MVP delivery, design systems, and cross-functional collaboration with engineering and product teams. Seeking a full-time or freelance Product Designer role at an international, remote-first company.

SKILLS

Core Disciplines	Product Thinking, Design Thinking, Information Architecture, Interaction Design, Visual Design, Wireframing, Prototyping, Usability Testing
Research & Testing	User Research, User Interviews, Usability Testing, Heuristic Evaluation, Card Sorting, CJM, A/B Testing, Surveys
Tools	Figma, Sketch, Adobe Photoshop, Adobe Illustrator, Axure RP, InVision, Principle; HTML/CSS awareness
Collaboration	Design Systems, Cross-Functional Collaboration, Stakeholder Management, Developer Handoff, Agile/Scrum, Design Sprints

WORK EXPERIENCE

Product Designer (Freelance), Self-Employed

Apr 2022 – Present

Partnered with 9+ clients across FinTech, enterprise SaaS, and e-commerce to design and ship user-centered products end-to-end, managing research, prototyping, and handoff independently in a fully remote context.

- Delivered the 0-to-1 MVP for **StarCheck** (crypto AML/KYT risk checker) by designing a two-click check-and-report flow with progressive disclosure, reducing user errors and enabling a freemium monetization model.
- Designed the end-to-end signing experience for **DocuChain** (secure e-signature + blockchain audit trail) by mapping trust-critical moments and applying step-based progress indicators, making a complex legal-tech workflow accessible to non-technical users.
- Redesigned core meeting workflows for **IVA Connect** (enterprise video conferencing) by simplifying navigation and reducing cognitive load, resulting in a more predictable experience for non-technical users in regulated environments.
- Modernized a UI component library (60+ components, Material-inspired) by conducting a gap analysis and delivering multi-theme specs with developer documentation, accelerating design-to-engineering handoff.
- Improved the product catalog section of a B2B e-commerce admin by conducting a UX audit and redesigning the information architecture, increasing structural clarity and long-term UI scalability.

Interface Designer, Usethics (IT Consulting & System Integration)

Jun 2017 – Mar 2022

Owned the full design process — from user research and concept definition to functional prototypes and developer handoff — across multiple client products in a consultancy environment.

- Accelerated design and development cycles by contributing to a shared design system, ensuring brand and interaction consistency across client products.

- Improved product usability by leading hypothesis-driven usability testing sessions and iterating on designs based on qualitative findings and stakeholder feedback.
- Defined information architecture and navigation systems for complex enterprise interfaces, reducing user errors and support load for client organizations.

UI/UX Designer, Tensor (Enterprise ERP — SBIS)

Jan 2015 – Mar 2017

Owned UX/UI for the claims and complaints module of SBIS, a large-scale enterprise resource planning product used by thousands of organizations across Russia.

- Proposed a new internal helpdesk system concept based on competitive analysis and user research, improving issue resolution workflows for internal teams.
- Reduced developer ambiguity by producing detailed user scenarios, animated prototypes in Axure RP, and structured technical specifications for the engineering team.

Project Manager, Volga-Web (Web Development Agency)

Jun 2014 – Jan 2015

- Delivered web projects on time by managing client communication, requirements gathering, and cross-team coordination between designers and developers.

EDUCATION

DesignerUp | 2025 – 2026 (In Progress)

Product Design (UX/UI) Program — covering Information Architecture, Card Sorting, User Research, and Design Systems

Yaroslavl State University (P.G. Demidov), Yaroslavl

Specialist Degree in Sociology (Comparable to Master's Degree)

PROFESSIONAL DEVELOPMENT

- UX/UI Designer Program — Uprock School (2021)
- Grids and Website Design — Bang Bang Education (2019)
- Mobile Designer (iOS) & UX Designer — Igor Dzhazov (2015–2016)

Languages: Russian (Native) | English (Working Proficiency, actively improving)
